

# Financial Tear Sheet

## Corporate Profile

New York-based Minerals Technologies Inc. is a resource- and technology-based growth company that develops, produces and markets worldwide a broad range of specialty mineral, mineral-based and synthetic mineral products and related systems and services. MTI serves the paper, foundry, steel, environmental, energy, polymer and consumer products industries. The company reported sales of \$1.798 billion in 2015.

### 07.13.16 Corporate Profile

On May 9, 2014, Minerals Technologies acquired AMCOL International Corporation, doubling the company's size to more than \$2 billion in revenue to establish a stronger foundation for future growth.

The Company has five reportable segments:

**Specialty Minerals:** The Specialty Minerals segment produces and sells the synthetic mineral product precipitated calcium carbonate (PCC) and the processed mineral product quicklime (lime), and mines, processes and sells other natural mineral products, primarily limestone and talc. This segment's products are used principally in the paper, building materials, paint and coatings, glass, ceramic, polymer, food and pharmaceutical industries. Minerals Technologies is the largest supplier of PCC to the worldwide paper industry.

**Refractories:** The Refractories segment produces and markets monolithic and shaped refractory materials and specialty products, services and applica
