(IRS Employer
Identification No.)

622 Third Avenue, New York, NY
(Address of principal executive offices)

10017-6707
(Zip Code)

Thomas J. Meek

(212) 878-1800

(Name and telephone number, including area code, of the person to contact in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2021.

SECTION 1 – CONFLICT MINERALS DISCLOSURE

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure – Reasonable Country of Origin Inquiry

(a) Minerals Technologies Inc. (“MTI”) is a resource- and technology-based growth company that develops, produces and markets worldwide a broad range of specialty mineral, mineral-based and synthetic mineral products and related systems and services. This Form SD is filed by MTI pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, as amended, for the period from January 1, 2021 to December 31, 2021 (the “Reporting Period”).

Under Rule 13p-1, MTI is required to determine whether any conflict minerals are necessary to the functionality or production of a product it manufactures or contracts to manufacture and, if so, to conduct, in good faith, a “reasonable country of origin inquiry” that is reasonably designed to determine whether any of those conflict minerals originated in the Democratic Republic of the Congo or an adjoining country (the “Covered Countries”) or is from recycled or scrap sources. The Securities and Exchange Commission defines conflict minerals as columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten, and any other mineral or its derivative determined by the U.S. Secretary of State to be financing conflict in a Covered Country (“Conflict Minerals”).

MTI conducted an evaluation of its product lines sold during the Reporting Period and determined that its Pyroid® HT thermal management material product (“Pyroid Product”), which is sold in small lot production quantities, contains small amounts of gold that is necessary to the functionality of the Pyroid Product. In addition, MTI determined that its CETSEAL® and HYDROFIX® products (“Environmental and Building Material Products”) contain small amounts of tin that is necessary to the functionality of the Environmental and Building Material Products. Other than the foregoing, MTI does not believe any of its other products manufactured (or contracted by MTI to be manufactured) and sold in the Reporting Period contained any Conflict Minerals.

(b) MTI determined that the gold used in its Pyroid Product was purchased from two suppliers during the Reporting Period. MTI conducted in good faith a reasonable country of origin inquiry that was reasonably designed to determine whether the gold used in the Pyroid Product originated in a Covered Country or is from recycled or scrap sources. As a result, MTI received and reviewed a completed Responsible Minerals Initiative Conflict Minerals Reporting Template (“RMI CMRT”) and certification from both suppliers that none of the gold supplied originates in a conflict region.

In addition, MTI determined that the tin used in its Environmental and Building Materials Products was purchased from two suppliers during the Reporting Period. MTI conducted in good faith a reasonable country of origin inquiry that was reasonably designed to determine whether the tin used in the Environmental and Building Materials Products originated in a Covered Country or is from recycled or scrap sources. This inquiry included communications with MTI’s suppliers of the product containing tin. The suppliers each provided MTI with a completed RMI CMRT, which MTI reviewed. The RMI CMRT from one such supplier certified that none of the tin supplied originates in a conflict region. The RMI CMRT from the other supplier indicated that none of its tin originates in the conflict region except that that one of the many smelters it uses has feedstock that originates in the Covered Countries, but that such smelter is compliant with the relevant RMI conflict-free smelter initiatives.

This Specialized Disclosure Form is being posted to the publicly available Internet site (<https://investors.mineralstech.com/sec-filings>) upon the filing of this Form SD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
