

## News Release

### Minerals Technologies Inc. Announces Participation in Gabelli's 3<sup>rd</sup> Annual PFAS Symposium

NEW YORK, September 4, 2025 (GLOBE NEWSWIRE) -- Minerals Technologies Inc. (NYSE: MTX) ("MTI") today announced its participation at Gabelli's third annual PFAS Symposium, which will be held in New York City on Wednesday, September 17, 2025. MTI leaders Barry Shadrix, Global Director of Water, Wastewater, and Remediation at MTI subsidiary CETCO, and Michael Kozak, CETCO's Business Unit President, are scheduled to present at 11:00am ET at The Harvard Club.

MTI will present its proprietary FLUORO-SORB® adsorbent technology, an effective approach to remediate PFAS – also known as “forever chemicals” – in water and soil.

FLUORO-SORB® easily fits into existing remediation efforts and was specifically formulated to bind across the entire spectrum of PFAS. It can be used as a flow-through filtration media, in a permeable reactive barrier, in situ stabilization, soil solidification, and sediment capping.

Over the last 24 months, FLUORO-SORB® has been installed in many full-scale applications and has been vetted by leading research universities and numerous field pilot studies that determined it to be a highly effective treatment media.

To register and for additional details and presentation materials, please visit MTI's [Events & Presentations](#) page.
